PROFESSIONAL SUMMARY

Web Developer and AI Automation Specialist with nearly 5 years across digital systems and 1+ year of intensive production AI automation. Built 100+ n8n workflows and 10+ connected systems for real business use. Hands-on experience with WordPress, Next.js, React, Node.js, TypeScript, REST APIs, webhooks, Supabase, PostgreSQL, Docker, Linux, AI agents, prompt engineering, structured outputs, and workflow validation. Solution-oriented problem solver focused on root-cause analysis, reliable implementation, maintainability, cost control, and business value.

TECHNICAL SKILLS

Web Development: WordPress, Gutenberg, WooCommerce, PHP, HTML, CSS, JavaScript, Next.js, Node.js, React, TypeScript

AI & Automation: n8n, AI Automation, AI Agents, Agentic Workflows, LLM Integration, Prompt Engineering, System Prompts, Structured Outputs, JSON, Function Calling, Tool Use, Human-in-the-Loop Workflows

APIs & Data: REST APIs, Webhooks, HTTP, JSON, API Integration, API Testing, Supabase, PostgreSQL

Infrastructure & Operations: Docker, Docker Compose, Linux, Ubuntu, Raspberry Pi, Cloudflare Tunnel, Git, GitHub, Hosting, Deployment, Monitoring, Troubleshooting

Problem Solving & Reliability: Solution Architecture, Root-Cause Analysis, Debugging, Input Validation, Output Validation, Retry and Fallback Logic, Logging, QA Gates, Cost and Usage Control, Production Readiness, Documentation

SEO & Business Systems: SEO, Technical SEO, WordPress Content Systems, GA4, Google Search Console, Google Ads, Meta Ads, Content Automation

PROFESSIONAL EXPERIENCE

Founder - Freelance Web & AI Automation Developer

GFX Hawker | Freelance | Remote / Pakistan | 2024 - Present

- Engineered and maintained 100+ n8n workflows and 10+ connected systems across content operations, WordPress publishing, lead handling, marketing workflows, monitoring, AI generation, and internal business processes.
- Designed multi-workflow architecture using REST APIs, webhooks, structured JSON, validation gates, approval steps, logging, retries, branching logic, and human review.
- Built AI agent and LLM-assisted workflows using prompt engineering, tool and function logic, structured outputs, context management, output validation, and cost-aware API usage.
- Built web systems and integrations using WordPress, Next.js, Node.js, Supabase, PostgreSQL, APIs, and automation-connected application patterns.
- Deployed self-hosted automation infrastructure using n8n, Docker, Raspberry Pi, Linux, private networking, and Cloudflare Tunnel.
- Translated business requirements into practical technical solutions, diagnosed root causes, documented important decisions, and improved reliability without unnecessary complexity.

Co-Founder - Web, SEO and Automation Operations

GFX Printer | Lahore, Pakistan | July 2022 - July 2026

- Built and managed WordPress websites, service pages, landing pages, SEO structures, content systems, and ongoing website operations for a printing, branding, and marketing business.
- Applied AI-assisted content workflows, automation, analytics, digital marketing, and technical troubleshooting to support business operations and content production.
- Supported SEO, technical SEO, Google and Meta advertising, website improvements, and reporting while keeping technical delivery aligned with commercial goals.

Digital Marketing Manager

Media Print UAE | Remote / Dubai, United Arab Emirates | September 2021 - July 2026

- Managed SEO, website improvements, content systems, analytics, digital marketing, automation, and AI-assisted content operations for a UAE printing business.
- From July 2022 onward, also supported WordPress website operations alongside repeatable SEO content and publishing workflows.
- Worked directly with business stakeholders to connect marketing activity with website, automation, content, and operational goals.

SELECTED TECHNICAL PROJECTS

Modern Web Applications and Data-Backed Systems

Built web application infrastructure for authenticated users, dashboards, roles and permissions, client-specific data, database-backed state, reports, API endpoints, webhook events, and automation integration.

Technologies: Next.js, Node.js, React, TypeScript, Supabase, PostgreSQL, REST APIs

n8n Multi-Workflow Automation Systems

Built connected automation systems for AI content, SEO, WordPress publishing, lead handling, social operations, monitoring, and internal processes with validation, retries, logging, approvals, and maintainable workflow boundaries.

Technologies: n8n, REST APIs, Webhooks, JSON, AI APIs, PostgreSQL, Docker

WordPress Development and Local Production Workflow

Developed and tested WordPress websites in controlled local environments before production changes, including Gutenberg, custom theme and PHP work, responsive implementation, troubleshooting, SEO foundations, and pre-production validation.

Technologies: WordPress, Gutenberg, PHP, CSS, DDEV, LocalWP, Docker

REST API, Webhook and Systems Integration

Connected websites, web applications, automation platforms, AI systems, WordPress, and external services using APIs and event-driven workflows with authentication, pagination, rate limits, validation, retries, and structured data exchange.

Technologies: REST APIs, HTTP, JSON, Webhooks, API Integration, n8n, JavaScript

Self-Hosted Automation and Production Infrastructure

Set up always-on automation and development infrastructure using Raspberry Pi 5, Docker, Linux, private networking, secure remote access, and Cloudflare Tunnel.

Technologies: Raspberry Pi 5, Linux, Docker, Docker Compose, n8n, PostgreSQL, SSH, Cloudflare Tunnel

ADDITIONAL EXPERTISE

AI & Prompt Engineering: System prompts, developer prompts, prompt templates, prompt chaining, structured prompt design, JSON output prompting, prompt validation, guardrails, context management, token management, hallucination reduction, AI output control

Security Awareness: Access control, credential handling, sensitive data handling, prompt injection awareness, website and API security awareness, safer deployment practices

Creative & Growth: SEO copywriting, landing page writing, digital marketing, ad creative strategy, graphic design, video editing, Figma, Canva, Adobe Photoshop, Illustrator, Premiere Pro, After Effects

WORK STYLE

Solution-oriented builder who converts unclear business problems into scoped systems, workflows, integrations, and implementation plans. Comfortable working with technical and non-technical stakeholders, documenting systems, explaining trade-offs, and balancing reliability, cost, speed, maintainability, user experience, and return on invested time and money.
