

Hamid Nuh

Full-Stack Web Application Developer | Next.js, React, Node.js & TypeScript

Lahore, Pakistan | Remote | mr@hamidnuh.com | Phone/WhatsApp: +92 314 4125292 | GitHub: github.com/hamidnuh

Portfolio: hamidnuh.com/portfolio | Focus: Full-Stack | Featured | DevOps | Applied AI | LinkedIn: linkedin.com/in/hamidnuh

PROFESSIONAL SUMMARY

Full-Stack Web Application Developer with hands-on experience building business web applications, authenticated systems, dashboards, API-backed workflows, database-backed state, and automation-connected software. Works across Next.js, React, TypeScript, Node.js, Supabase, PostgreSQL, REST APIs, webhooks, Git, Docker, Linux, deployment, and monitoring. Also brings 4+ years of WordPress/web development experience plus practical AI and automation integration, with a focus on maintainable implementation, root-cause debugging, reliable data flow, and business usefulness.

TECHNICAL SKILLS

Full-Stack Application Development: Next.js, React, TypeScript, JavaScript, Node.js, HTML, CSS, Responsive UI, Authenticated Application Patterns, Dashboards, Admin Interfaces, Roles and Permissions

Backend, APIs & Integrations: Node.js, REST APIs, Webhooks, HTTP, JSON, API Integration, Authentication, API Testing, Pagination, Rate Limits, Third-Party Integrations

Data & Application State: PostgreSQL, Supabase, Database-Backed State, Client-Specific Data, Reports, API-Backed Workflows

Engineering & Infrastructure: Git, GitHub, Docker, Docker Compose, Linux, Ubuntu, Hosting, Deployment, Monitoring, Cloudflare

Tunnel, Root-Cause Debugging, QA Gates

Supporting Web Experience: WordPress, Gutenberg, WooCommerce, PHP, DDEV, LocalWP, Technical SEO, Website

Troubleshooting

AI & Automation Integration: n8n, AI Agents, LLM Integration, Prompt Engineering, Structured Outputs, Tool/Function Logic, Human-

in-the-Loop Workflows

PROFESSIONAL EXPERIENCE

Founder - Freelance Full-Stack & Automation Developer

GFX Hawker | Freelance | Remote / Pakistan | 2024 - Present

- Built web application systems and integrations using Next.js, React, Node.js, TypeScript, Supabase, PostgreSQL, REST APIs, webhooks, and automation-connected application patterns.
- Implemented application infrastructure for authenticated users, dashboards, roles and permissions, client-specific data, database-backed state, reports, API endpoints, and webhook events.
- Connected web applications with automation and AI systems using APIs, structured JSON, validation, retries, human review, and reliable workflow boundaries.
- Used Git and GitHub workflows, Docker, Linux, hosting, deployment, monitoring, and troubleshooting to reduce production risk and improve repeatability.
- Built and maintained web/CMS systems alongside full-stack application work, giving practical experience across business websites, applications, APIs, data, and automation.
- Translated business requirements into maintainable technical solutions, diagnosed root causes, documented important decisions, and avoided unnecessary complexity.

Co-Founder - Web, SEO and Automation Operations

GFX Printer | Lahore, Pakistan | July 2022 - July 2026

- Built and managed WordPress websites, service pages, landing pages, SEO structures, content systems, and ongoing website operations for a printing, branding, and marketing business.
- Applied AI-assisted content workflows, automation, analytics, digital marketing, and technical troubleshooting to support business operations and content production.
- Supported SEO, technical SEO, Google and Meta advertising, website improvements, and reporting while keeping technical delivery aligned with commercial goals.

Digital Marketing Manager

Media Print UAE | Remote / Dubai, United Arab Emirates | September 2021 - July 2026

- Managed SEO, website improvements, content systems, analytics, digital marketing, automation, and AI-assisted content operations for a UAE printing business.
- From July 2022 onward, also supported WordPress website operations alongside repeatable SEO content and publishing workflows.
- Worked directly with business stakeholders to connect marketing activity with website, automation, content, and operational goals.

SELECTED FULL-STACK & SYSTEMS PROJECTS

Modern Web Applications and Data-Backed Systems

Built web application infrastructure for authenticated users, dashboards, roles and permissions, client-specific data, database-backed state, reports, API endpoints, webhook events, and automation integrations.

Technologies: Next.js, Node.js, React, TypeScript, Supabase, PostgreSQL, REST APIs

REST API, Webhook and Systems Integration

Connected web applications, websites, automation platforms, AI systems, WordPress, and external services using APIs and event-driven workflows. Worked with authentication, pagination, rate limits, structured data exchange, validation, retries, and reliable integration behavior.

Technologies: REST APIs, HTTP, JSON, Webhooks, API Integration, Node.js, JavaScript

Authentication, Roles and Application Workflow Patterns

Worked with authenticated application patterns, roles and permissions, client-specific data, API-backed state, reports, and workflow boundaries that support business-facing dashboards and operational systems.

Technologies: Next.js, React, Node.js, Supabase, PostgreSQL, REST APIs

Automation-Connected Web Systems

Built 100+ n8n workflows and connected automation systems that integrate websites, APIs, AI services, databases, monitoring, lead events, content operations, and internal business processes.

Technologies: n8n, REST APIs, Webhooks, JSON, PostgreSQL, AI APIs

Containerized Development and Production Infrastructure

Used Docker, Linux, Raspberry Pi, private networking, Git/GitHub, hosting, deployment, testing, and Cloudflare Tunnel for practical development and always-on services.

Technologies: Docker, Docker Compose, Linux, Raspberry Pi 5, PostgreSQL, SSH, Cloudflare Tunnel

ADDITIONAL EXPERTISE

WordPress & CMS: 4+ years of WordPress/web development experience, including Gutenberg, WooCommerce, PHP, custom themes, local production workflows, troubleshooting, technical SEO, and integrations

AI & Automation: AI agents, prompt engineering, structured outputs, validation, tool/function logic, n8n workflow orchestration, human review, and cost-aware API use

Security Awareness: Access control, authentication awareness, credential handling, sensitive data handling, API security awareness, prompt injection awareness, safer deployment practices

WORK STYLE

Full-stack developer who turns business requirements into scoped applications, APIs, integrations, and supporting systems. Comfortable working across frontend, backend, data, infrastructure, and automation boundaries while keeping implementation maintainable, testable, and commercially useful.
